

BROCO BRO-BR22-PLUS BR-22 PLUS CUTTING TORCH

Redesigned collet provides tighter hold on the cutting rod. Redesigned collet washer removed rubber from the oxygen stream and extends washer life.

The internal gasket reduces electrolysis, insulates the diver's hand from electrical current, and reduced potential for gas pockets in the torch.

Sintered element slag arrestor withstands more heat and sparks and increases oxygen flow rate.

Non-return valve stops the flow of hot gasses in the event of a flash back.

Valve level and valve stem have been redesigned to allow manual return should the valve stem get stuck.

Redesigned valve to better meter flow.

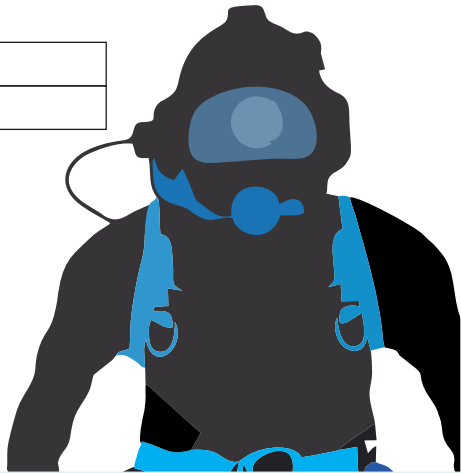

Ceramic washer provides non-combustible electrical isolation

PTFE-lined fiberglass-reinforced hose withstands extremely high operating temperatures and is combustion-resistant.

Sr.	Description
1	21 design improvements
2	Removal of all rubber from direct oxygen pathway
3	PTFE-lined fiberglass reinforced coupler hose
4	Improved flash arrestor with higher oxygen flow rate
5	Better flashback protection
6	Non-return valve to prevent back flow
7	Improved collet and collet washer design
